# Intuition and Technology Enhance Your Creativity

How do you feel today?

Where do you work with whom or by yourself?

Is it going to be a collaborative meeting or privately concentrated work on your own?

You decide how to use the Luce chair.

Enjoy endless ways to be creative with the Luce chair.

As the name says, light is ever-changing, from dawn to sunset.

It energizes, heals, relaxes, and makes us lively.

How will you interact with it?

# *Luce*

Luce naturally responds to a fast paced move on the go. How it reacts to your intuition surely affects your creative workflow.

From large meetings to smaller discussions, Luce has endless possibilities to expand how to utilize not just your space but your idea, too.

You can see even greater versatility of Luce when used as workstation or with tables on castors. Luce seamlessly helps change layout at ease from one to another, and it helps your ideas prosper as well.

In your office today you may be at the center of highest traffic or meeting with key clients in a relaxed but concentrated atmosphere. In whatever kind of space you may be, give the space you use often the supreme comfort and adaptability.

# Smart Relaxation Seat

The forward tilted seat gently greets the body and supports the seating to ease the weight load to the thighs and the lower back.

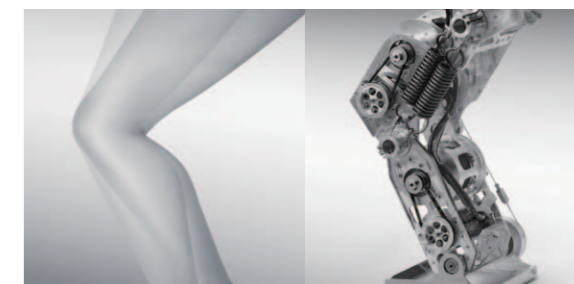

The forward tilted seat flexibly adjusts the angle of seating at the maximum of 15 degrees that provides the proper seating position from an ergonomic aspect.

The backrest reclines at maximum of 15 degrees with synchro-tilt function achieving a comfort.

## Robot Leg Technology

The Robot Leg was developed through research into the mechanics of human bones and muscles that can "jump" and "land" on the ground just like us.

OKI Electric Industry's expertise accumulated during the Robot Leg development combined with OKAMURA's expertise in chair development gave birth to a totally new chair "Luce".

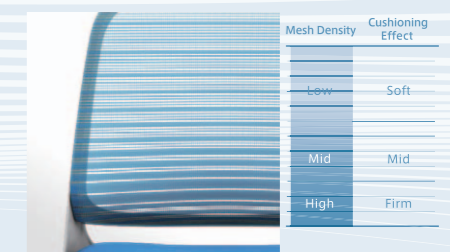

# Gradated Supportive Mesh

The gradation in the mesh fabric is a cutting-edge technology which has made it possible to change the mesh density to create support where needed.

The area around the lumbar is highly dense for firm support, while the upper back area is less dense to provide a soft and comfortable fit. The gradated design is appealing in both aesthetic and functionality.

## The integration of functions and light form design by Giugiaro

**GIUGIARO**  
DESIGN

Designed by the world renowned industrial design house, Giugiaro Design. A simple design that is light, easy and with a functional beauty. The compact and light feel leaves an open and airy feeling in the office space.

### Adjustment

#### Seat Height Adjustment

The seat height can be adjusted up and down (100mm with flexible levels) using the lever on the right hand side.

### Ecology

- Designed for Recycling**  
 Designed for ease in separate materials for recycling.
- Recycled PET Cloth**  
 Thanks to advanced recycling technology, recycled PET cloth with polyester fibres from plastic bottles and fibres is used in manufacturing of the chair.
- Designed for Longevity**  
 The back and seat cushions can be replaced separately, making for easy maintenance and a long service life.
- Ample Use of Recycled Resins**  
 Recycled resins are amply utilized to help make effective use of existing resources.
